Paul Cullen - Revolutions per Minute

[Events](#) > [Exhibitions](#)

[Paul Cullen](#)

at [Jane Sanders Art Agent](#)

23 Jul 2010 - 22 Aug 2010

Added by [aa](#) Paul Cullen says â€œRevolutions per Minute is an ongoing sculptural project Iâ€™ve been developing since 1994, currently comprised of sixteen completed sculptures with others still in development. Revolutions per Minute is characterised by the deployment of either rotation or circulation. Early works like The Geographer (2) feature a rotating world globe

while in Discovery of Oxygen and In Vitro water is circulated through a system of improvised plumbing.â€

Each sculpture is based around a common object, tables and chairs mostly, with items such as plastic fruit, world globes, rulers and electric motors providing the basis for rotation. Works involving the circulation of water employ pipes and hoses, stainless steel and plastic buckets, cardboard boxes, and water pumps.

This exhibition will showcase a group of the Revolutions per Minute sculptures; several from the 90â€™s alongside more recent iterations of the project.

A publication titled Revolutions per Minute, funded by CNZ, is currently being designed by Narrow Gauge (<http://www.ltc.name/>) and will be available through www.splitfountain.org/ later in the year.

To view a selection of images please go to www.paulcullen.info/ and do let me know if you would like a larger format digital images to be sent through.
