A DIAGRAM

Outdoor project for [Headland](#), Headland Sculpture, Waiheke Island.
Installed from 28 January – 20 February 2011.

Project Statement:

A coastal site with southerly aspect, overlooking Motukaha Island and Sergeant Channel. On the raised edge of a steep sea-cliff. Views of the harbour and island. Geology: argillite, indurated marine mudstone: dark grey-green, well sorted, well cemented.
