

New Zealand Pew Survey 'Spring 2021' Covid-related Results

Charles Crothers

Abstract

NZ results relating to Covid of a 'Spring' Pew Research center survey are presented. NZers tend to be strong supporters of NZ's handling of the Covid outbreak.

Key Words New Zealand, Pew, Survey, Covid

In a series of reports and accompanying data displays the Pew Research Center [<https://www.pewresearch.org/>] interestingly released the results of a survey of x countries, which for the first time included NZ. The 'sample' of countries in this study is relatively small (n=17). Some results stretching back several years from other survey rounds – and including more countries - are also included (see Appendix). 'Spring' is the Northern Hemisphere Spring. In addition, the respondent level results will be released in perhaps a year's time allowing further analyses. It may be of local import to bring the NZ results to NZ attention.

Countries covered are United States, Canada, Belgium , France, Germany, Greece, Italy, Netherlands, Spain, Sweden, United Kingdom, Australia, Japan, New Zealand, Singapore, South Korea, Taiwan – 2 North American, 9 European, 2 Antipodean and 4 Asian.

The information is focused on some important issues relating to NZ (and other) societies and includes results relating to

- Covid
- Diversity
- Climate.

This research note concentrates on covid only. Questions asked are:

- Q6b. Do you think the government of ____ respects the personal freedoms of its people
- Q7c. Would you say that each of the following has done a very good, somewhat good, somewhat bad, or very bad job dealing with the coronavirus outbreak? c. (survey public)

- Q8 As a result of the coronavirus outbreak, has your own life changed... a great deal a fair amount, not too much not at all?
- Q9. Thinking about (survey public) as a whole, do you think this country is now More united More divided than before the coronavirus outbreak?
- Q10 Thinking about restrictions on public activity in (survey public) over the course of the coronavirus outbreak, do you think there should have been More restrictions; Fewer restrictions or The restrictions were about right
- (Survey public)'s economy is... Recovering from the effects of the coronavirus outbreak in ways that show the strengths of its economic system
- Q12. How much confidence do you have in the healthcare system in (survey public) to handle a future global health emergency that might occur
- Q29. Thinking about the economic consequences of the coronavirus outbreak, have the European Union's economic relief efforts gone too far, not gone far enough or been about right? (Included in Appendix).

A very careful methodology is deployed across countries with NZ details in the table.

	New Zealand pew methods
Year:	2021
Survey:	Global Attitudes Survey
Sample design:	List-assisted Random Digit Dial (RDD) probability sample of landline households (30% of sample) stratified by region and RDD probability sample of cell phone users (70% of sample). Individuals within landline households are selected using the youngest adult male or female method. Interviews in the cell sample are conducted with the person who answered the phone, if age 18 or older. For both landline and cell samples, up to seven phone calls are made to complete the interview with the selected respondent.
Mode:	Telephone
Language:	English
Fieldwork dates:	March 15 - April 30, 2021
Sample size:	1,000
Margin of error:	3.7
Representative:	Adult population 18 plus (excluding residents of Chatham Islands)
Primary vendor:	Gallup
Weighting variables:	Gender, age, education, region, urbanity and probability of selection of respondent
Design effects:	1.46

NZers (although eclipsed by Swedes) accord their government particularly high score for respect of personal freedoms (82%). (NZers are more skeptical that the US Government observes similar respect for US citizens). NZers (closely followed by Singaporeans) ALSO ACCORD the government as 'very good' (74%) in its dealing with the Covid outbreak. Although similar to Taiwan few NZers see the Covid outbreak as having changed their life a great deal (12%). Although not so high as

Singaporeans nevertheless a very high proportion of NZers (75%) think NZ is more united rather than more divided compared to before the outbreak. Few NZers wanted ore restrictions (11%). A high proportion of NZers (69%) see its recovery as showing the strengths of its economic system. Moreover, there is considerable confidence of NZers that their health system is able to handle a future global health emergency. On all of the items, NZ is at the ‘good’ extreme, although not always the most satisfied country response pattern.

Tables: Pew survey results ‘spring’ 2021

Q6c. Do you think the government of _____ respects the personal freedoms of its people or don't you think so?	Yes	No	DK/R	Total
United States	63	35	1	100
